Clark County EMS Response Report 2026
Response Trends

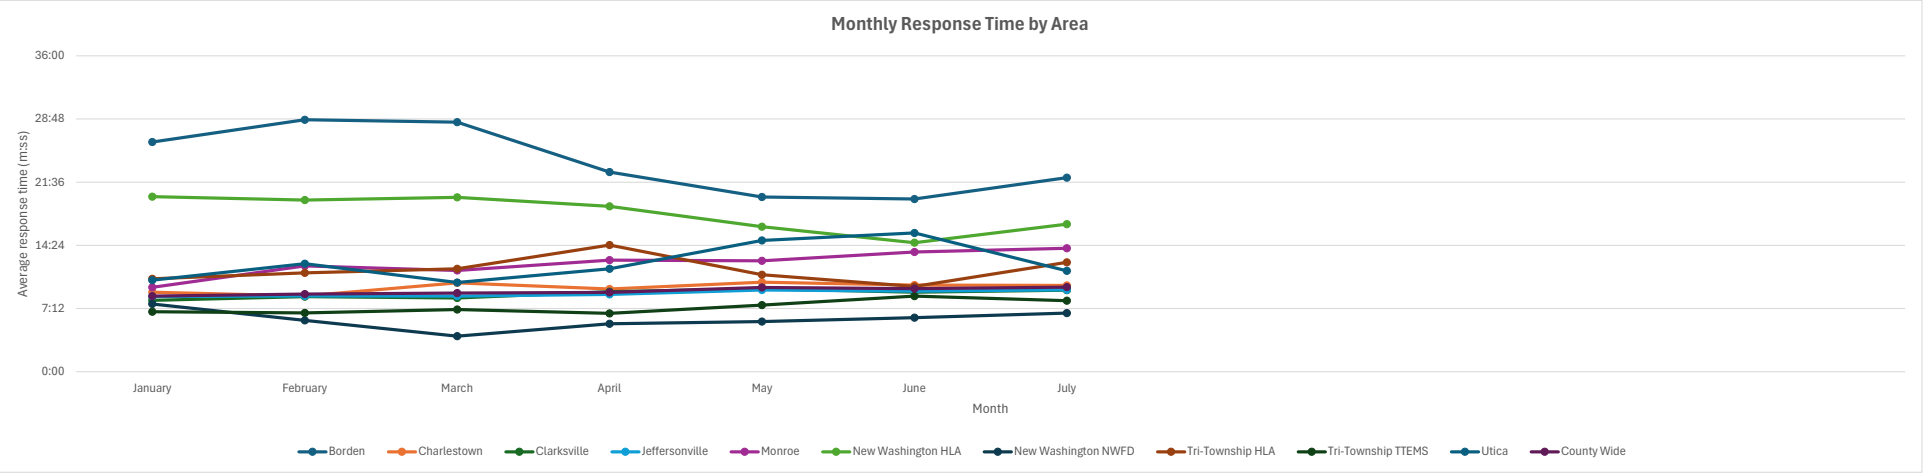

Response Time Trends by Area

January–December 2026 | Average dispatch-to-arrival response time

How to read: lower response times are better. Across every performance column, green means faster and red means slower. Positive numbers mean faster response times; negative numbers mean slower. YTD Performance compares the first and latest populated month. Trend Performance uses every populated month. Recent 3-Mo Performance compares the earliest and latest three-month averages. Future months stay blank until run data is entered. County Wide uses the reported county-wide average, not a sum.

RESPONSE TIME BY AREA												
Area	January	February	March	April	May	June	July	August	September	October	November	December
Borden	26:11	28:43	28:26	22:45	19:55	19:41	22:07
